

MANSFIELD, PA—The new Mansfield University International Walkway will be dedicated on Monday, October 26 at noon. The ceremony will take place on the walkway, which runs along the west side of Grant Science Center.

University officials, international students and financial supporters of the initiative will be on hand. The public is invited to attend.

Six flags, representing some of the countries that current Mansfield students come from, are now in place. Future plans call for a flag to be flown for each country represented in MU's student population.

Funding for the project has come through donations from alumni and friends of MU. The donations paid for the installation of the poles and purchase of the flags, as well as establishing a scholarship fund.
